

To whom it may concern,

I am writing this letter in support of Trevor Kansaki . As Trevor's coding teacher at Roosevelt High School, I have had the pleasure of working with him closely and observing his skills and work ethic.

Trevor is an exceptional student who possesses a strong aptitude for coding and computer science. He has a keen ability to understand complex algorithms and quickly grasps new programming concepts. During his time in my class, he consistently demonstrated an outstanding work ethic and a strong willingness to learn.

Trevor is a team player and possesses excellent communication skills. He works effectively with his classmates and is always willing to help others when needed. He also has a positive attitude and a great sense of humor, which makes him a joy to work with.

One of Trevor's accomplishments that I remember fondly is his desire to restart a Robotics program here at Roosevelt which included securing funding to modernize equipment, mentor new students, and take the teams to competitions.

Throughout the course, Trevor has consistently produced high-quality work and has shown a great deal of creativity and originality in his projects. He is always eager to take on new challenges and is highly motivated to continue improving his skills.

Based on Trevor's performance in my class and his ability to work in teams, I am confident that he has the potential to excel in any professional setting that he chooses to pursue.

Please do not hesitate to contact me if you have any further questions or require additional information.

Sincerely,

Mr. Howard Kam
